LOCATIONLIST

This is the list of all locations involved in the competition. Our digital network consists of more than 175 Roadside and City displays across 88 locations. This list is a selection of these locations.

The Roadside displays are located all over the country along the busiest motorways. The City displays are located in various areas in and around the Netherlands' major cities. The digital displays are optimally integrated into their environment and architecture to create maximum impact. The optimal integration of the displays allows for great diversity, e.g. large and small, square and round and landscape and portrait displays. Due to this diversity, the displays use different resolutions and offer different creative possibilities. More information about the specific delivery specifications for a location can be found on our website under

[Delivery Specifications.](#)

If you would like to discuss the available possibilities of our displays or if you have any questions, feel free to contact us.
